International application No.

PCT/AU2004/001399

Α.	CLASSIFICATION OF SUBJECT MATTER					
Int. Cl. 7:	C12Q 1/68					
According to	International Patent Classification (IPC) or to both	national classification and IPC				
В.	FIELDS SEARCHED					
	mentation searched (classification system followed by c	lassification symbols)				
SEE BELOV		ent that such documents are included in the fields search	ned			
SEE BELOV	v					
Electronic data WPIDS, ME	base consulted during the international search (name of DLINE, CA: epilepsy, BFNIS, SCN2A, sodiu	data base and, where practicable, search terms used) im channel alpha subunit, voltage gated sodiu	m channel.			
C.	DOCUMENTS CONSIDERED TO BE RELEVANT					
Category*	Category* Citation of document, with indication, where appropriate, of the relevant passages					
PX	Berkovic SF et al (2004) "Benign familial r of a new sodium channelopathy" Ann Neur See whole document	1-27				
x	Heron SE et al (2002) "Sodium-channel defects in benign familial neonatal-infantile seizures" The Lancet 360, 851-2  X See whole document  Mulley JC et al (2003 April) "Channelopathies as a genetic cause of epilepsy" Current Opinion in Neurology 16, 171-6  X See whole document					
x						
X F	urther documents are listed in the continuation	n of Box C X See patent family anne	ex			
"A" docume not cons "E" earlier a	onal filing date	er document published after the international filing date or priority date and not in inflict with the application but cited to understand the principle or theory derlying the invention current of particular relevance; the claimed invention cannot be considered novel cannot be considered to involve an inventive step when the document is taken				
"L" document which may throw doubts on priority claim(s) "Y" do		cument of particular relevance; the claimed invention cannot be considered to volve an inventive step when the document is combined with one or more other ch documents, such combination being obvious to a person skilled in the art				
"O" document referring to an oral disclosure, use, exhibition or other means "&" do  "P" document published prior to the international filing date		locument member of the same patent family				
but later	than the priority date claimed	T				
Date of the act	ual completion of the international search  2004	Date of mailing of the international search report  1 0 NOV 2004				
Name and mail	ing address of the ISA/AU	Authorized officer

International application No. PCT/AU2004/001399

Observations where certain claims were found unsearchable (Continuation of item 2 of first sheet) Box No. II This international search report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons: 1. Claims Nos.: because they relate to subject matter not required to be searched by this Authority, namely: Claims Nos.: 8 in part X because they relate to parts of the international application that do not comply with the prescribed requirements to such an extent that no meaningful international search can be carried out, specifically: Claim 8 has only been searched in part because the claim is not limited to the technical features of the invention. The use of "and/or" in the claim means that the claimed method does not necessarily involve testing for alterations in the SCN2A gene, a feature that is considered to be integral to the invention. As such the search has been restricted to methods that involve testing for alterations in the SCN2A gene and the KCNq2 and/or 3 genes.. 3. Claims Nos.: because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a) Box No. III Observations where unity of invention is lacking (Continuation of item 3 of first sheet) This International Searching Authority found multiple inventions in this international application, as follows: As all required additional search fees were timely paid by the applicant, this international search report covers all 1 searchable claims. As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee. As only some of the required additional search fees were timely paid by the applicant, this international search report 3. covers only those claims for which fees were paid, specifically claims Nos.: No required additional search fees were timely paid by the applicant. Consequently, this international search report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.: Remark on Protest The additional search fees were accompanied by the applicant's protest. No protest accompanied the payment of additional search fees.

Information on patent family members

International application No.

PCT/AU2004/001399

This Annex lists the known "A" publication level patent family members relating to the patent documents cited in the above-mentioned international search report. The Australian Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
